

## REDEFINING YOUTH EMPLOYABILITY - NAVIGATING FUTURES

Project No: 2023-3-EL02-KA154-YOU-000184073

# Introduction to RiseUp

The RiseUp Project is an Erasmus+ initiative that focuses on strengthening youth employability and social inclusion across Europe. It brings together young people, educators, and organisations to create opportunities for learning, collaboration, and growth. The project aims to help young people develop skills, confidence, and awareness that prepare them for meaningful work and active participation in their communities. RiseUp encourages equality, fair employment, and solidarity as essential values for a sustainable and inclusive future.

# Project Objectives

- Empower young people with strong professional and civic competences that support their personal and social development.
- Promote access to quality employment and fair opportunities for all young people across Europe.
- Support youth participation in decision-making processes at local, national, and European levels.
- Strengthen collaboration between education, training, and the labor market to bridge the gap between learning and work.
- Raise awareness about the importance of fair working conditions and equal rights in the workplace.
- Promote social protection measures that ensure safety, dignity, and stability for young workers.
- Encourage the recognition of non-formal and informal learning as effective pathways to employability and empowerment.
- Contribute to a broader vision of inclusive growth, equality, and social participation for all young people.

## Project Partners

The RiseUp partnership unites organisations from Greece, Italy, Latvia, and Bulgaria, each bringing valuable expertise in youth work, education, and community development. Together, they collaborate on research, training, and innovative tools that strengthen employability and participation. The diversity of partners ensures that RiseUp reflects different European perspectives and responds effectively to the needs of young people in various social and economic contexts.

# Our Activities

Since its launch, RiseUp has implemented a range of local and international activities designed to inspire and connect young people. Events such as The Youth Symposium in Greece, The Open Dialogue in Latvia, The Youth Festival in Bulgaria, and other workshops have offered spaces for reflection, skill-building, and collaboration. Participants have discussed employability, leadership, entrepreneurship, and inclusion while exchanging experiences that promote solidarity and understanding. Each event contributes valuable insights to the RiseUp Toolkit and strengthens the project's European network.

The official RiseUp website, <http://riseup-erasmus.eu>, serves as the central platform for information, learning, and communication. Visitors can explore project updates, resources, and toolkits that support youth empowerment and participation. The site also features sections dedicated to partner organisations, news, and best practices. It welcomes young people, educators, and stakeholders to engage with RiseUp's mission, access educational materials, and become part of a growing community that believes in equality, opportunity, and active citizenship.
